

UNIVERSITÄT ZU LÜBECK

Closing the Medical Faculty in Lübeck would be a grave mistake

The Lübeck Medical School is top-ranked for its teaching quality of medical students, for its academic and scientific excellence, and for successfully translating research findings into innovative products and solutions through its unique conjunction with the Technical Faculty of the University and the strong biotechnology industry in the Lübeck area.

The undersigned of this letter are actively involved in highly successful research collaborations with the outstanding Medical Faculty of the University of Lübeck.

We all strongly urge the State Government of Schleswig-Holstein to withdraw the closure plan and to make a definitive, long-term commitment to the University of Lübeck.

Die Schließung der Medizinischen Fakultät in Lübeck wäre ein schwerwiegender Fehler.

Die Medizinische Fakultät ist höchstbewertet für die Qualität der Mediziner Ausbildung, für ihre akademische und wissenschaftliche Exzellenz und für die erfolgreiche praktische Umsetzung von wissenschaftlichen Ergebnissen in innovative Lösungen und Produkte durch eine einzigartige Verknüpfung mit der Technisch-Naturwissenschaftlichen Fakultät und mit der starken Biotechnologie-Industrie im Raum Lübeck.

Die Unterzeichner dieses Briefes sind aktiv an sehr erfolgreichen wissenschaftlichen Kooperationen mit der herausragenden Medizinischen Fakultät der Universität zu Lübeck beteiligt.

Wir alle mahnen die Landesregierung Schleswig-Holsteins nachdrücklich, den Schließungsplan zurückzuziehen und den Fortbestand der Universität zu Lübeck langfristig zu sichern.
